

DB 300/1 Sound level meter

Integrating-averaging with storage function

Class 1

DB300/1 sound level meter respects the most recent international standards and brings to the user a high comfort in use.

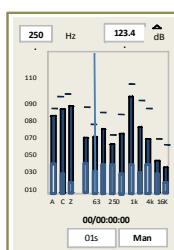

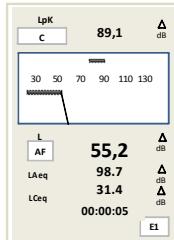

From the simple sound level measurement to the frequency analysis in real time, DB300/1 covers the most applications in the finding of solutions to get better the noise environment

DB300/1 stores the measurement datasets that can be then transferred in a computer with the LDB23 software.

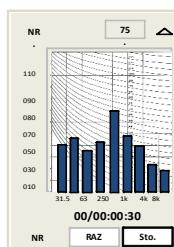

Main measured values

- The weighted noise level : **L_X**
- The equivalent continuous level : **L_{XA}**
- The peak pressure level : **L_{Upk}**
- The noise exposure level : **L_{Ex}**

- Values and graphic representation of the **NR** comfort criteria

- Real time analyser by octave bands – 16 Hz to 16 kHz

Business application

- Environment
- Monitoring and emergencies
- Industry
- Noise spectrum 1/1 octave
- Noise of machines and NR evaluation curves
- Process monitoring, conformity check
- Noise to workstation

I/O Interface

- Detection of sensitive levels for alarm activation
- Analogue output DC : 0-10V:0 -137dB

Other information

- Minimum and maximum values, peak values
- Statistical distribution of the measured values : **L_{01-L_{10-L_{50-L_{90-L₉₅}}}}**

Data visualization

DB300/1 is supplied with the **LDB23** software for display data and measurement report printing.

TECHNICAL FEATURES

Standards

Sound level meter : NF EN 61672-1 (2002) - NF EN 60651 (1979) – NF EN 60804 (2000) – CEI 61260

CE conformity : EN 61010 – EN 61000 generic and as per product standard

Metrology

Accuracy : Class 1 - NF EN 61672-1

Microphone type : Electret – ½" - Sensibility : 45 mV/Pa

Measuring type : Free-field

Measurement dynamic : Lp / Leq : 117 dB - Lpk : 54 dB

Single dynamic range Lp and Leq / Lpk : 20-137 dBA

25-137 dBC (Z) / 83-137 dBC (Z)

X frequency weighting : A – C – Z

Multi-spectrum frequency analysis : filters by octave bands – 16

Hz // 16 kHz

Y frequency weighting : F (fast) – S (slow) – I (impulse) – U : Peack

Logging time for short Leq (DI) : 1/16s -1/8s-1/4s-1/2s-1s to 60 s

(1s step)

Measured values : LXY – LXYmax – LXYmin - LXeq,T – LXeq,DI – LXE – LXeq,Dlmax – LXeq,Dlmin

Statistic indices LAN LAeq samples : L01 – L10 – L50 – L90 – L95 – 1 dB resolution.

Measured values simultaneously : All according to LXY conventional mode or LXeq integrator mode

Detection and percentage of overload : Alarm graphics and calculation of percentage during the storage

Sound level meter

Preamplifier..... removable – extension of 3-5-10 m – on request

Screen..... graphical display 240 x 160 pixels – LCD monochrome 16 levels – digital and analog display – 3D effect on display

Keypad..... 8 sensitive keys

Clock..... permanent, saved by internal battery – accuracy better than 0.01%

Memory module removable Micro SD card 2Go

Environment..... from -10 °C to +50 °C

Humidity..... from 0 to 90% HR

Size (L x l x e)..... 270 x 70 x 40 mm

Weight (with batteries)..... 355 gr

Fixing..... Insert at rear for fixing on tripod

Operating

Measurement modes..... conventional and start/stop integrating – integrating analyser with storage – NR comfort criteria - S1 + S2 calculator

Storage and measurement capacity..... Lp-Leq start/stop mode : unlimited
Leq-St mode : according to elementary logging time (from 1/16e s to 60s)
Memory capacity with frequency analysis by full octave band :

- Base Leq 1s : 135 days to share from 1 to 99 periods.

- Base Leq 1/16°s : 8 days to share from 1 to 99 periods.

Interface I/O..... Output DC : 0-10V / 0-137dB

Output for alarm activation : TTL level 3.3 V

Measurement launching..... By keyboard

Power – Autonomy..... Li-Ion battery : minimum autonomy : more than 24 h at 20 °C

Guarantee..... 2 years

Supplied with

- Li-Ion battery – 3 x AA batteries coupling device - windscreens
- Transport case
- USB type charger - Adapter
- Calibration certificate
- USB type transfer cable
- User manual
- LDB200 software

Optional accessories

- Extensions for preamplifier : 3-5-10 m
- Tripod
- Acoustic calibrator class 1 (NF EN 60942:2003)
type : **CAL300**
- Jack cables for I/O interface

Acoustic calibrator
